

# Frequency® 55 Multifocal

*A unique lens system featuring Balanced Progressive™ Technology for optimum vision quality at every distance*

## OVERVIEW

If you're in your 40s, you may have found reading has become more difficult. If so, you're likely experiencing a common vision condition called presbyopia, a natural part of your eyes' aging process. Fortunately, bifocal eyeglasses are not the only option for clear vision. Now you can enjoy optimum vision quality at every distance and the freedom of soft contact lenses, with Frequency 55 Multifocal lenses from CooperVision.

Frequency 55 Multifocal contact lenses offer a new level of vision quality thanks to revolutionary Balanced Progressive Technology, a unique system utilizing two different lenses that work together to provide clear vision whether you're looking near, far or anywhere in between.

## AT A GLANCE

- ▶ A unique two-lens system
- ▶ Optimum vision at every distance
- ▶ Balanced Progressive Technology
