

Proclear® Sphere Contact Lenses

Enjoy all day comfort, all month long

OVERVIEW

Imagine wearing contact lenses that felt as fresh and comfortable at the end of the day as when you first put them in. With Proclear, you can! They're the perfect choice for anyone looking for more lens comfort and outstanding vision quality, especially if you're one of the 50% of lens wearers who experience discomfort or dryness, or if you spend extended periods of time looking at a computer screen or in climate-controlled environments.

Proclear can offer you an unmatched level of comfort because they're made from a unique material containing synthetic molecules of phosphorylcholine (PC), a substance found naturally in human cell membranes. These molecules attract and surround themselves with water, and it's this PC Technology™ that helps keep the lenses moist and comfortable, even after 12 hours of wear.

In fact, Proclear lenses are the only contacts with FDA clearance for the claim: "may provide improved comfort for contact lens wearers who experience mild discomfort or symptoms relating to dryness during lens wear."

AT A GLANCE

- ▶ The ultimate in all-day comfort
- ▶ Outstanding vision quality
- ▶ Patented PC Technology
- ▶ Convenient monthly replacement schedule
