

Proclear® Toric Contact Lenses

All-day comfort, all month long for those with astigmatism

OVERVIEW

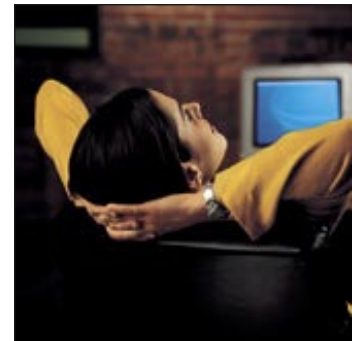

If you have astigmatism, Proclear Toric soft contact lenses offer you unmatched all day comfort and outstanding vision quality. They're especially beneficial if you're one of the 50% of lens wearers who experience discomfort or dryness, or if you spend a lot of time looking at a computer screen or in climate-controlled environments.

This unrivaled level of comfort is yours thanks to revolutionary PC Technology™, which has created a unique soft contact lens material containing a synthetic form of Phosphorylcholine (PC), a substance found naturally in human cell membranes. These PC molecules bind and surround themselves with water, helping keep the lenses moist and comfortable, even after 12 hours of wear.

In fact, Proclear lenses are the only contacts with FDA clearance for the claim: "may provide improved comfort for contact lens wearers who experience mild discomfort or symptoms relating to dryness during lens wear."

AT A GLANCE

- ▶ Unmatched all day comfort
- ▶ Outstanding vision quality
- ▶ Patented PC Technology
- ▶ Easy-to-remember monthly replacement schedule
