

Preference® Toric XR Contact Lenses

Comfort and convenience for those with high levels of astigmatism

OVERVIEW

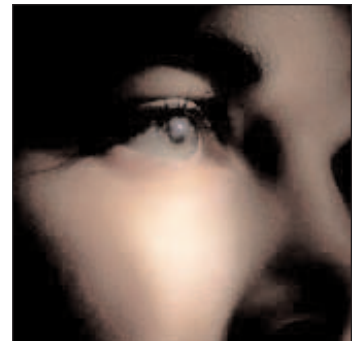

With the expanded prescription offerings of Preference Toric XR, more astigmatic patients than ever can enjoy the comfort and convenience of the Preference Toric family. These soft contact lenses are durable, easy to handle and virtually maintenance-free. They're also an excellent alternative or addition to glasses.

Unlike disposable lenses which can be difficult to handle, Preference Toric XR lenses are designed for easy use. Their unique lens design, durable tetrafilcon A material and light blue handling tint make Preference Toric XR ideal for active lifestyles.

While tetrafilcon A produces a more durable lens, this deposit-resistant material also promotes greater comfort and healthier eyes. And, because it resists protein and other debris produced from tears, you'll be less likely to develop eye irritations or end-of-day dryness.

AT A GLANCE

- ▶ Unlike disposable lenses which can be difficult to handle, Preference Toric XR lenses are designed for easy use.
- ▶ Durable and virtually maintenance-free
- ▶ Easy to handle
- ▶ Quarterly replacement schedule
